

RECONFIGURING AND UPDATING UTILITIES

New Gas-Fired Boiler

New gas-fired boiler replaces old coal-fired boilers

- Projected cost savings of \$2.2M per year
- New boilers reduce carbon emissions by 43%
- New boiler will provide steam for American Centrifuge Project, DUF6 Conversion, and potential future users of the site

Old Coal-Fired Boiler

Size Comparison

- The new gas fired boiler facility is 1/28th the size of the old coal-fired boiler facility.
- The old coal-fired boiler facility occupied 7 acres of land while the new gas-fired boiler facility only occupies 1/4 acre of land.
