## Landfills & Plumes

DOE worked with the Ohio EPA to develop
 a unique regulatory approach that resulted
 in a cross-functional challenge to ultimately
 provide up to 1000 contiguous acres within
 Perimeter Road that can be made available
 for future use.

- The use of previously closed landfills and plumes at the site is being strategically used as fill for the OSWDF.
- This aerial view shows an active excavation project at the 5-unit plume.
