

2023 Fluor-BWXT Portsmouth S.T.E.A.M.

Scholarship Guidelines

The recent addition of "arts" majors to the scholarship program is limited to majors that would lead to potential employment at FBP or one of our sister companies. Those majors include communications, journalism, photograph, videography, graphic design, business, finance, human resources, architecture, and English. The committee is open to consider other "art" fields of study that may relate to work at the PORTS site. If you feel we have overlooked a major please contact Deneen.Garner@ports.pppo.gov. The scholarship board will review all request and respond promptly. In addition, you can visit the following site for more examples of STEAM careers:

[STEM Careers - 30 Popular & 10 Unusual STEM Jobs \(careerschoolnow.org\)](https://careerschoolnow.org)

Please note: Only applicants with majors in the approved fields of study will be considered for the 2023 FBP S.T.E.A.M. scholarship.
