

Major Projects at PORTS

X-326 D&D *(Decontamination & Decommissioning)*

The **X-326 Process Building**

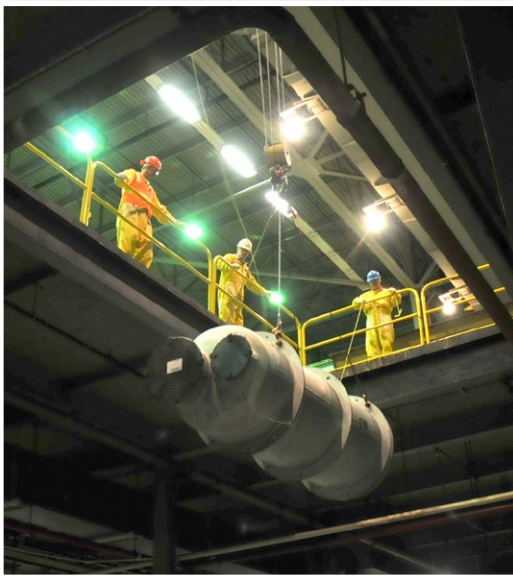

originally produced highly enriched uranium for use in the nation's defense program and nuclear Naval vessels.

Since 2012, more than

7,000

 process components

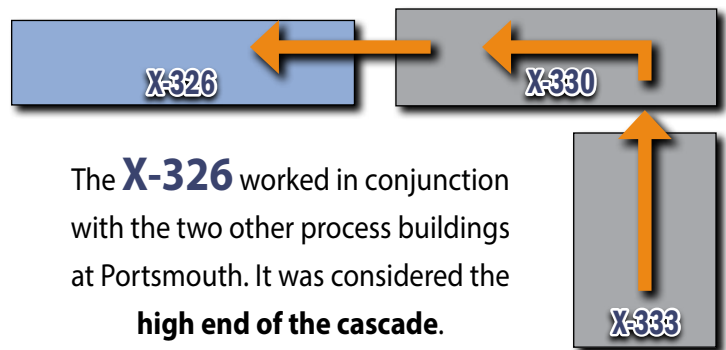

have been carefully removed.

The **final power source** was removed Sept. 25, 2019

Ready for Demolition in 2020

- Downgrade facility from a Cat 2 Nuclear Facility
- Downgrade security
- Utility isolation and relocation

The **X-326** worked in conjunction with the two other process buildings at Portsmouth. It was considered the **high end of the cascade.**

The **X-326 Building** is approximately **1/2 mile long.**

One Half Mile

• 880 Yards

• 2,640 Feet

• 7 Football Fields
